# COMMODITY TRADING - BRASIL

ITAPEMA

**ADR8** is the exclusive distributor of **Agrocooper Group Brasil** products to China, the UAE, Spain, and Italy. **Agrocooper Group Brasil** is one of the largest agroholdings in Brazil, which confirms their ultimate reliability

Acting on behalf of **Agrocooper Group Brasil** **ADR8** may offer a turnkey solution for the supply of commodities incl. agricultural products from Brazil on CIF terms

We create opportunities for fair and transparent trade around the world managing risks and developing procedures in strict accordance with the rules of Global trading of International Chamber of Commerce

Sugar, wheat, soy, corn, coffee beans, oats, flour, grains, precious metals – this is not the full range of what we can offer to our clients

Contact us for consultation: +370-685-296-16 (Rita) and +55-11-97890-2758 (Dmitriy)

*"ADR8 is a mix of team talents, specific strategy, right motivation and wide logistics network across the world. We push boundaries every day by facing and solving challenges of any kind. We see the key to success in enhancing our services and continually improving our skills to maintain the highest level of service to our customers"*

– **Alexander Dias, Director Executivo, Agrocooper Group Brasil**

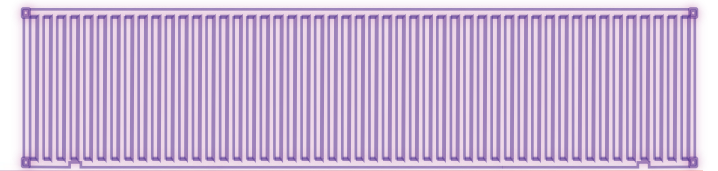

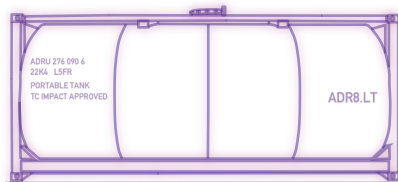

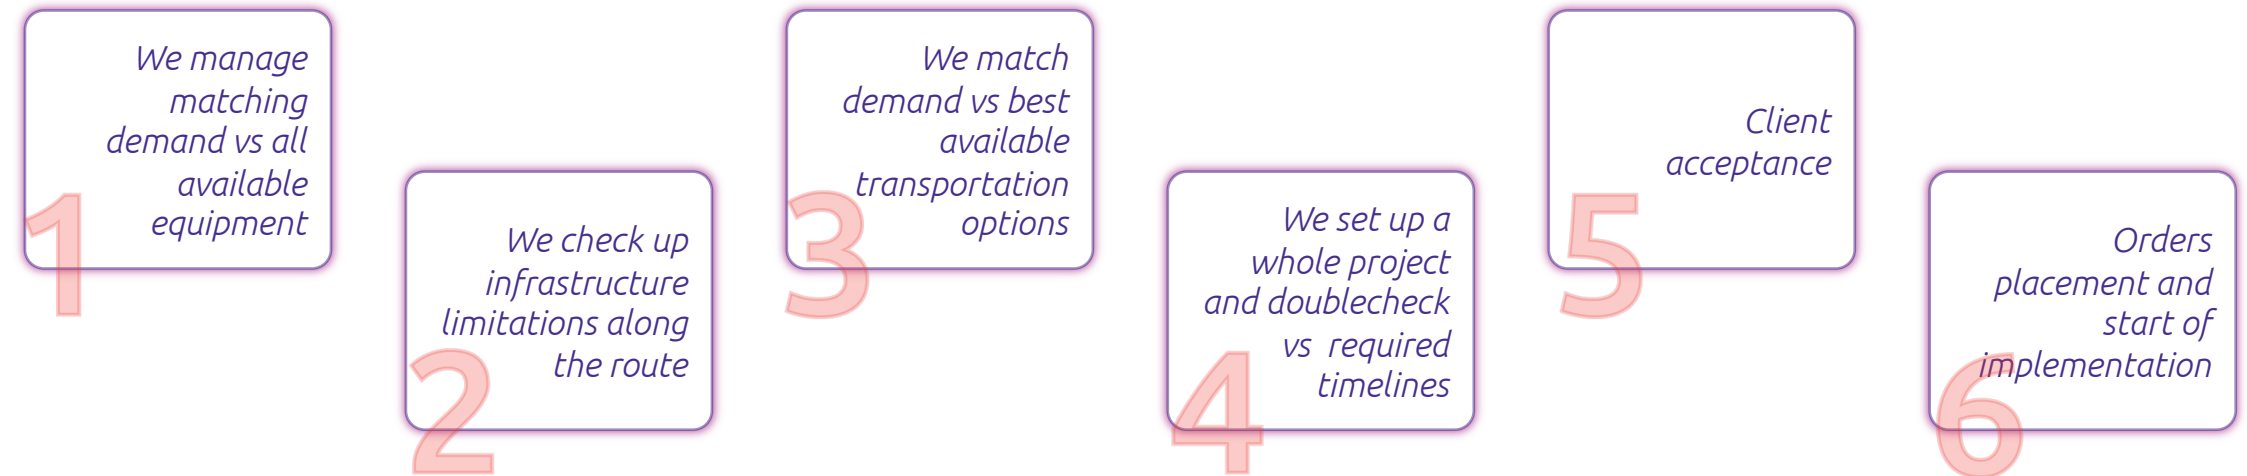

# MULTIMODAL

*Multimodal logistics is a core competence of ADR8 team. We make lots of different multimodal projects around the globe. Our prime goal is to achieve and maintain premium quality in multimodal service at competitive rates. We do our business transparently applying our best efforts to troubleshoot issues along entire route*

## **Standard MM** set up process:

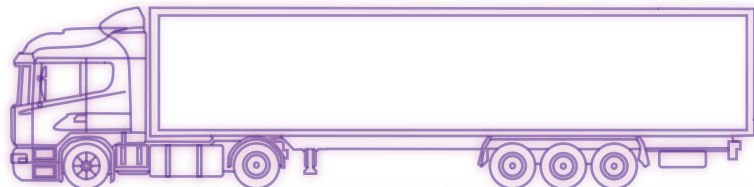

# TRUCKING

*ADR8 has been developing trucking business since 2008. For these years we have accumulated enormous scope of experience which we'd love to share with our Clients. Thousands of cases, wide network of carriers and warehouses, "turn-key solutions", non-standards projects that all makes our experience in ROAD transportation so useful and applicable to your transportation demand*

<b>Directions</b>	<b>Cargo</b>	<b>Type</b>	<b>Equipment</b>	<b>Consolidation</b>	<b>Insurance</b>
<b>EU – CIS</b>	<b>ADR</b>	<b>FTL</b>	<b>Dry Vans</b>	<b>n</b>	<b>CMR</b>
<b>Within EU</b>	<b>General</b>	<b>LTL</b>	<b>Side Kits</b>	<b>Lietuva</b>	<b>Expediting</b>
<b>China – CIS</b>	<b>Oversize</b>	<b>Partial</b>	<b>Trawls</b>	<b>Poland</b>	<b>insurance</b>
<b>EU – Turkey</b>	<b>Heavy</b>		<b>Flatbeds</b>	<b>Turkey</b>	<b>Extra for &gt;150 k</b>
	<b>Containers</b>		<b>Reefers</b>	<b>Excise</b>	<b>euro of value</b>
				<b>warehouse</b>	

*ADR8 always provides all possible options of transportations of your cargo achieving **highest level of reliability and flexibility** at very **competitive rates***

# AIR FREIGHT

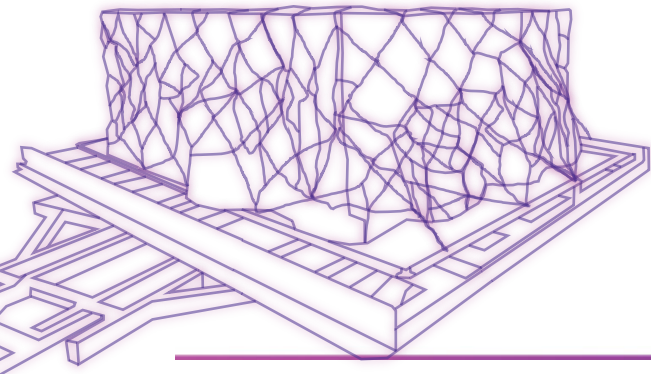

*Our clients can always rely on ADR8 air forwarding team. We can provide fast and simple air-freight services which perfectly fit to a demand. Our prime carriers' network is always available to achieve your business goals*

***Dedicated** air freight **team** which perfectly understands your demand and requirements*

*Access to **global network** of prime providers*

*Short notice shipments with our specialised **charter options***

***Seamless operations** in accordance with industry standards*

*We have experience of chartering IL-76 and Antonov 124, B747 Jumbo as a tailor-made solution to complicated industrial projects. Air freight logistics can guarantee that your cargo to be delivered the most fast and safe way*

# RAIL

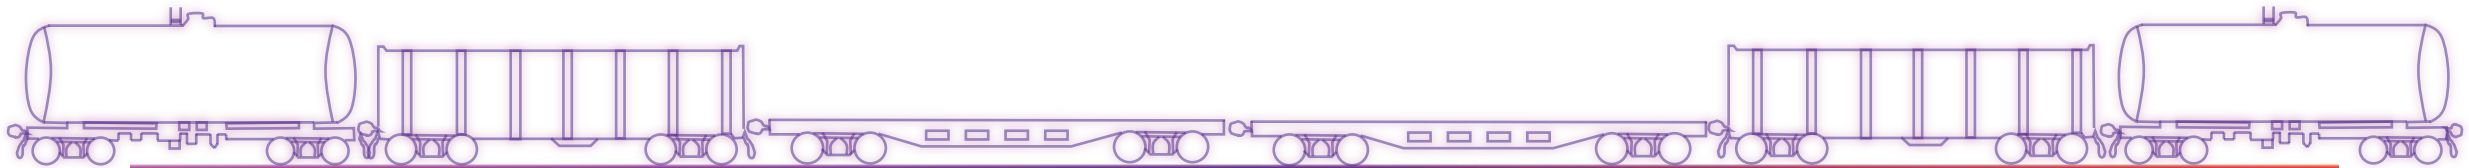

*It's well known that railway is still highly efficient mode if it's applicable to the demand. We optimize loading, match it vs. optimal type of railcar and provide the rate. We can maintain transloading your cargo of 1520 railcars to 1435 at partners' terminals*

*We presently operates railcars by **following routes**:*

- *within Kazakhstan*
- *Kazakhstan – Turkey (through Caspian)*
- *BY – Kazakhsatn, Uzbekistan*
- *Kazakhstan – China – Kazakhstan*
- *EU – Ukraine*
- *Within EU (as part of multimodal projects)*
- *CIS - Turkey*

*We presently operates following railcars **types**:*

- **Gondola**
- **Covered**
- **Flats (universal and fittings)**
- **RTC's**

# PROJECTS

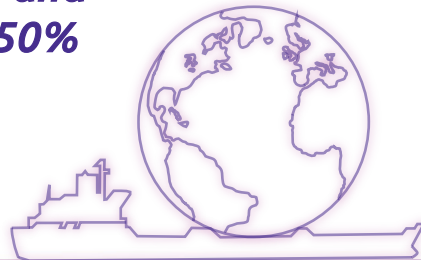

*Heavy and oversized loads, infrastructure bottlenecks, tons of permits, specific custom clearance and safety and environmental issues make project logistics (PL) the most challenging and full of difficulties*

*PL mostly driven by schedule and risks than a cost requiring specific knowledge and skills from project management team to streamline the path*

*Here are **major highlights** of PL principles we follow to maintain integrity*

## **Pre-project**

*We pre-appraise risks, calculations, capacities and make preliminary offer to our client with no commitment at this stage. Accuracy of terms and budget is around 50%*

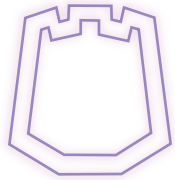

**Set up** – once we get a list of shipments, packing and detailed project schedule we start developing solutions at each section (trucks, sea/rail/heavy lift solutions, charters etc) and after this we get back to our client with crystal clarity how to perform it

**Implementation** – here we implement PL solutions based on “max reliability” principle. We build robust communication bridges between all participants forecasting next operation steps and minimizing project risks
